## On the cards

### What's happening in 2014

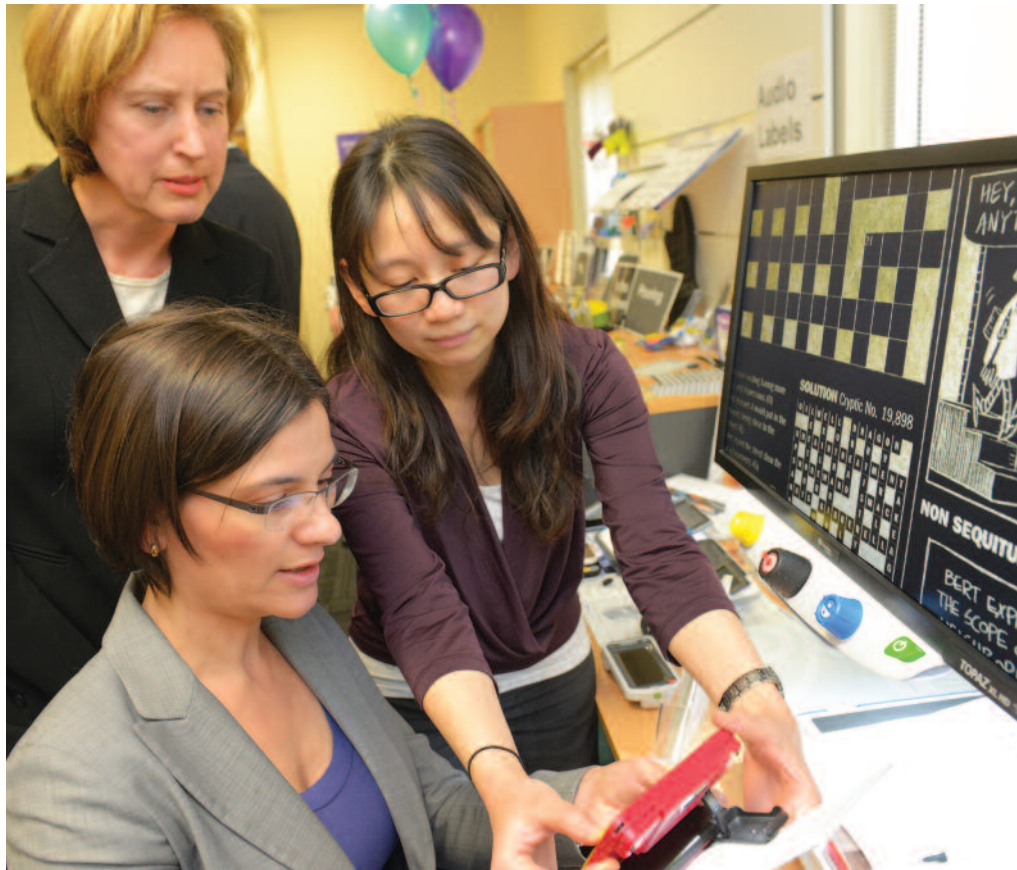

#### Student Careers Expo at SRC *Thinking of employing a student?*

In 2014, we're excited to be making the Student Careers Expo a part of the weekend of activity that is SRC. We think this will increase the opportunity for a wide range of members to be involved. It is free to individual OAA members – all you need is to book a table.

The Expo provides you with the chance to meet and chat with final year students, learn about their skills, and promote any current or future employment opportunities in your practice. In 2014, you'll have the chance to meet final year students from both the Doctorate of Optometry at Melbourne University, as well as students from Deakin, who will be embarking on a program of intensive clinical placements prior to graduating in June 2015.

#### Up to speed on standards? Audit your practice

Optometry is being practised in a rapidly-changing environment. Scope of practice continues to change, providing new opportunities, but also new decisions, about how you practice. The regulatory environment has also altered substantially, reflecting the high expectations of the (GO TO PAGE 3)

ACO Maureen O'Keefe (BACK LEFT) with Jennifer Kanis, MLA, State member for Melbourne (SITTING) and optometrist Iris Huang (RIGHT) at the launch of the ACO Low Vision clinic on October 10.
