Order of Australia honours

10 Jun

Once again the Queen's Birthday Awards have honoured outstanding Australians who have made a significant contribution to Australian society, and once again Vision 2020 Australia is thrilled to be associated with a number of these outstanding Australians. The Board and staff of Vision 2020 Australia warmly congratulate each of the recipients on their awards and thanks them for their tireless efforts in each of their chosen fields.

Professor Nathan Efron AC

President of the [Australian College of Optometry](#) and researcher at the Queensland University of Technology, Prof Efron was appointed Companion of the Order of Australia for his eminent service to medicine in the field of clinical optometry, particularly to vision correction and corneal physiology, as an academic, researcher and author, to the treatment of juvenile diabetes, and through executive rôles with national and international professional organisations. Prof Efron is the first optometrist to receive this honour.
