

Dry Eye and Orthokeratology Clinical Workshops

AUSTRALIAN COLLEGE OF
OPTOMETRY
CLINICAL SERVICES • RESEARCH • EDUCATION

SUNDAY 16 JULY

Join us for a full day of anterior eye workshops, or choose a half-day workshop targeting your area of clinical interest.

The morning session is designed as an update on recent developments in the diagnosis, classification and management of dry eye, with face-to-face lectures complimented by a hands-on practical session to refine and develop new skills.

The afternoon orthokeratology workshop is an interactive face-to-face session to enhance your practical skills in orthokeratology using real-life case examples.

Online lectures from orthokeratology experts accessible in advance of the workshop will build your knowledge base with tips and tricks on lens fitting and troubleshooting to maximise learning opportunities in the skills-based workshop.

SESSION 1: DRY EYE

LECTURE 1:

Recent developments in the diagnosis and classification of dry eye and how subtyping can promote treatment success

Presented by Dr Leigh Plowman

Since the diagnosis and classification of dry eye disease is continually evolving, this lecture presented by Dr Leigh Plowman, the founder of the "Dry eye directory," will present the latest evidence around dry eye disease's pathophysiology and diagnosis with case studies illustrating how appropriate subtyping can promote treatment success.

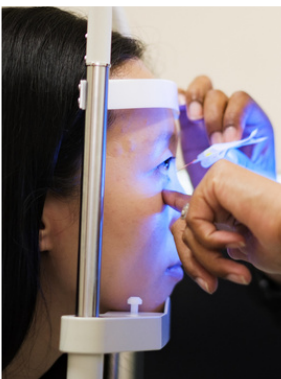

LECTURE 2:

Beyond basic lubricants: Treating multifactorial dry eye disease

Presented by Varny Ganesalingam

Incorporating a holistic and comprehensive approach to the treatment of dry eye can be a clinical balancing act. Explore management techniques beyond basic lubricants such as lipiflow, IPL and Meibomian gland expression techniques alongside oral and topical therapeutic options.

WORKSHOP:

Dry eye practical

Led by Laura De Angelis

Elevate your dry eye management skills through quantitative symptom assessment and discover how state-of-the-art instruments such as the OCULUS Keratograph 5M can streamline your dry eye examination process.

Master meibum expression and meibography grading techniques to evaluate meibomian gland dysfunction and explore treatment options such as the Lipiflow and Lumenis IPL treatment systems in a hands-on demonstration.

When:

8.30am - 1pm,
Sunday 16th July 2023

Where:

ACO, 374 Cardigan St,
Carlton, VIC 3053

Fees:

ACO Members: \$200
Non Members: \$280

CPD:
